The Maligned King

For centuries the vision of Richard III has been dominated by the fictional creations of Thomas More and Shakespeare. Voices have protested during the intervening years, some of them eminent and scholarly, urging a more reasoned view to replace the traditional black portrait. Annette Carson seeks to redress the balance by examining the events of his reign as they actually happened.

OUTBACK

The Discovery of Australia's Interior

In 1800, while the coast of Australia had finally been charted, the vast interior of the continent, was unexplored. Derek Parker's new and exciting book gathers together the stories of those intrepid explorers who, often against great odds, on journeys of months or even years, beat starvation, inadequate information and mapping, disease and loss, to forge routes which would enable the country's development. A fascinating read.

FORGOTTEN BATTLEFRONTS OF THE FIRST WORLD WAR

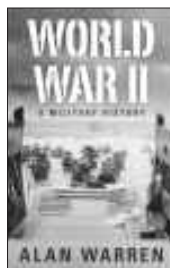

The struggle between Germany and the Allies along the Western Front is for many the most familiar element of World War I. However, many less well-known theatres of conflict, key to the overall progress and conduct of the war, hold as much relevance. In this work, the author sheds light on the fighting methods of the protagonists in less familiar settings, whether in the Italian Alps or in the cloying heat of the Greek coast.

WORLD WAR II

A Military History

In the First World War many battles degenerated into indecisive campaigns of attrition. By the 1930s, aircraft, armoured vehicles and new forms of motorised transport became available to make possible a fresh style of offensive warfare when the next European war began in 1939. Alan Warren chronicles the sixteen most decisive battles of the Second World War, from the Blitzkrieg of Poland to the fall of Berlin.

This is a story of supreme courage and stark terror, and of two men's bid to commit the perfect murder: that of Adolf Hitler. Count Claus von Stauffenberg (Military Officer and War Hero, recently played by Tom Cruise in the movie *Valkyrie*) and Rear Admiral Wilhelm Canaris (Head of WWII German Intelligence) were two of the leading lights of the German 'Valkyrie' conspiracy to assassinate Adolf Hitler. There were the last of seventeen failed attempts to kill The Fuhrer and to rid the world of his evil. But fate was to work against them.

TOBRUK

The Great Siege 1941-2

The siege of Tobruk was the longest in British military history. The coastal fortress and deep-water port was of crucial importance to the battle for North Africa, and the key that would unlock the way to Egypt and the Suez Canal. For almost a year the isolated garrison held out against all attempts to take it. Goebbels referred to its defenders as 'rats,' which, in characteristic British fashion, the whole army proudly adopted as their title, the 'Desert Rats,' and the port became a symbol of resistance.

ASSASSINS

The Story of Medieval Islam's Secret Sect

The so-called 'Assassins' are one of the most spectacular legends of medieval history. Universally loathed and feared, they were especially frightening because they apparently had no fear of death. Bartlett's book deftly traces the origins of the sect out of the schisms within the early Islamic religion. It follows the vivid history of the group over the next two centuries, including its clash with the crusaders, and its near destruction at the hands of the Mongols.
