Bricker, Ph.D. and Elizabeth Twombly M.S.

Distributed in Australia and New Zealand by Woodslane PTY LTD

Ages & Stages Questionnaires® (ASQ®) provides reliable, accurate developmental and social-emotional screening for children between birth and age 6. Drawing on parents' expert knowledge, ASQ has been specifically designed to pinpoint developmental progress and catch delays in young children—paving the way for meaningful next steps in learning, intervention, or monitoring.

With its parent-friendly design and flexibility in administration, ASQ works in the entire range of settings where young children are served—from child care centers to public health fairs. ASQ is designed for early educators, pediatricians, interventionists, and more.

"We chose ASQ because it is easy to do, low cost, culturally sensitive, and it meets our purpose of basic screening for our children's development. Our infant teachers base their curriculum on each individual child based on the ASQ."

-Kathy Bostic, Program Supervisor, Pinehurst Child Care Center

Professionals love ASQ because it's everything you want in a screener: highly valid, reliable, accurate, cost-effective and easy to score in just minutes. And now it has the online components you've been asking for!

Parents love ASQ because it relies on their expert knowledge and makes them full partners in the screening process. It's also a great way to bond with kids and learn more about their development.

Children love ASQ because it's just plain fun. Some questions are quick activities, so screening feels like playtime.

Experts love ASQ because it's been researched and tested with an unparalleled sample of diverse children. Organisations such as the American Academy of Neurology, First Signs and the Child Neurology Society all identify ASQ as a high-quality screener. ASQ was also favourably reviewed in articles appearing in the American Academy of Pediatrics journal Pediatrics in Review.

ASQ-3's parent-centric design yields unparalleled accuracy and efficiency.

At a glance:

- Type of screening: Developmental
- Areas screened: Communication, Gross Motor, Fine Motor, Problem Solving, and Personal Social
- Age range: 1–66 months
- Number of questionnaires: 21
- Who completes it: Parents/caregivers
- Time to complete: 10–15 minutes
- Who scores it: Professionals
- Time to score: 2–3 minutes
- Languages: Arabic, English, French, Spanish, and Vietnamese
- capture parents' in-depth knowledge
- highlight a child's strengths as well as concerns
- teach parents about child development and their own child's skills
- highlight results that fall in a "monitoring zone," to make it easier to keep track of children at risk

STEP 1 Choose the right questionnaire for the child's age.

STEP 2 Give it to the parent to complete and return.

STEP 3 Parent fills out the questionnaire at home.

STEP 4 Score the questionnaire when the parent returns it.

STEP 5 Share results with the parent.

Discuss referral options if there are developmental concerns.

STEP 6 Give parents fun ASQ-3™ Learning Activities.

Help them boost development at home between screenings!

Social-emotional health: look to ASQ:SE-2 for truly accurate screening.

Today, as more children are increasingly exposed to risk factors such as poverty or toxic stress, the likelihood of depression, anxiety, and anti-social behavior increases. There is tremendous opportunity during the first few years of a child's life to identify and address potential social-emotional concerns.

ASQ:SE-2 is an easy-to-use tool with all the advantages of ASQ-3 - it's cost-effective, parent-completed, photocopiable, and culturally sensitive. With questionnaire results, professionals can quickly recognize young children at risk for social or emotional difficulties, identify behaviors of concern to caregivers, and identify any need for further assessment.

ASQ:SE-2 at a glance:

- Type of screening: Social-emotional development
- Areas screened: self-regulation, compliance, social-communication, adaptive functioning, autonomy, affect, and interaction with people
- Age range: 1–72 months
- Number of questionnaires: 9
- Who completes it: Parents/caregivers
- Time to complete: 10–15 minutes
- Who scores it: Professionals
- Time to score: 1–3 minutes
- Languages: English, Spanish, Arabic, and French

"I like the ASQ:SE, which is an easy non-threatening tool to use to assess important social-emotional developmental milestones of the baby.... This tool lends itself well to developing educational activities to foster a healthy parenting relationship."

-Cynthia Suire, MSN, RN, Nurse–Family Partnership Program Louisiana Office of Public Health

“What I love about the ASQ is that it allows our staff to catch delays quickly and allows us to get our clients the early intervention programs that they sometimes need. In many cases [ASQ] helps us catch children up before they start kindergarten, therefore providing children with the start that they deserve.”
