Building a Future-Proof Cloud Infrastructure

By Gai Silvano

PEARSON EDUCATION US

By moving service modules closer to applications, Distributed Services (DS) Platforms will future-proof cloud architectures-improving performance, responsiveness, observability, and troubleshooting. Network pioneer Silvano Gai demonstrates DS Platforms remarkable capabilities and guides you through implementing them in diverse hardware. Focusing on business benefits throughout, Gai shows how to provide essential shared services such as segment routing, NAT, firewall, micro-segmentation, load balancing, SSL/TLS termination, VPNs, RDMA, and storage-including storage compression and encryption. He also compares three leading hardware-based approaches-Sea of Processors, FPGAs, and ASICs-preparing you to evaluate solutions, ask the right questions, and plan strategies for your environment.

- * Understand the business drivers behind DS Platforms, and the value they offer.
- * See how modern network design and virtualisation create a foundation for DS Platforms.
- * Achieve unprecedented scale through domain-specific hardware, standardised functionalities, and granular distribution.
- * Compare advantages and disadvantages of each leading hardware approach to DS Platforms.
- * Learn how P4 Domain-Specific Language and architecture enable high-performance, low-power ASICs that are data-plane-programmable at runtime.
- * Distribute cloud security services, including firewalls, encryption, key management, and VPNs.
- * Implement distributed storage and RDMA services in large-scale cloud networks.
- * Utilise Distributed Services Cards to offload networking processing from host CPUs.
- * Explore the newest DS Platform management architectures.

Exam Ref AZ-500 Microsoft Azure Security Technologies

By Diogenes Yuri

PEARSON EDUCATION US

Direct from Microsoft, this Exam Ref is the official study guide for the new Microsoft AZ-500 Microsoft Azure Security Technologies certification exam.

Exam Ref AZ-500 Microsoft Azure Security Technologies offers professional-level preparation that helps candidates maximize their exam performance and sharpen their skills on the job. It focuses on specific areas of expertise modern IT professionals need to demonstrate real-world mastery of Azure security. Coverage includes:

- * Managing identity and access.
- * Implementing platform protection.
- * Managing security operations.
- * Securing data and applications

Microsoft Exam Ref publications stand apart from third-party study guides because they:

- * Provide guidance from Microsoft, the creator of Microsoft certification exams.
- * Target IT professional-level exam candidates with content focused on their needs, not "one-size-fits-all" content.
- * Streamline study by organizing material according to the exams objective domain (OD), covering one functional group and its objectives in each chapter.
- * Feature Thought Experiments to guide candidates through a set of "what if?" scenarios, and prepare them more effectively for Pro-level style exam questions,
- * Explore big picture thinking around the planning and design aspects of the IT pros job role

For more information on Exam AZ-500 and the Microsoft Certified: Azure Security Engineer Associate credential, visit <https://docs.microsoft.com/en-us/learn/certifications/azure-security-engineer>.
