ENT Made Easy

By Amtul Salam Sami

Diseases of the ears, nose and throat are amongst the most common presentations in primary care, and many patients are referred to ENT clinics in secondary care for further medical and surgical management. To help reduce these referrals this book guides readers through the basic anatomy and pathophysiology and then, for each presentation, provides: * an introduction which describes possible causes and the history required * a section on diagnosis, including which examinations and investigations to consider * management options, complications to look out for, and when to refer. This book offers practical guidance and so helps to fill the gap between ENT theory and the actual work experience. In addition to covering the common presentations, from allergic rhinitis to vertigo, via dysphagia and halitosis, the book also provides a description of the main investigations and covers the problems occurring in paediatric cases.

Clinical Evidence Made Easy

By Michael Harris, Gordon Taylor

Clinical Evidence Made Easy is a concise and accessible introduction for any healthcare professional looking to understand clinical evidence and data sources. *Clinical Evidence Made Easy* scores maximum 100 and 5 stars on Doody's (Sept 2014)! Here's what the reviewer said: "The authors present the concepts in a unique and simple way that is easy to read and understand." From other reviews: "The chapters are succinct. The text is simple and easy to follow.....I really like this text. The title says it all - Clinical Evidence Made Easy" Ulster Medical Journal "; the book will be useful for anyone who is interested in evidence-based practice and who wants to be able to read published research papers and to pose appropriate questions of them." Nursing Times As clinical evidence becomes increasingly important in healthcare it is vital that healthcare professionals can read, analyse, and understand the clinical data being presented.

Allergy and Asthma Made Easy

By *Amtul Salam Sami*

A concise, practical guide to the diagnosis, treatment and management of common allergy and asthma conditions in primary care. Allergy and asthma represent some of the most common chronic conditions presenting in primary care. Furthermore, up to 20% of patients with allergies struggle daily with the fear of anaphylactic shock or an asthma attack. This book guides readers through the basic immunology and pathophysiology and then provides details on all aspects of the clinical assessment of allergic patients: History-taking Clinical examination Investigations and imaging A broad range of allergies is then presented with succinct clinical advice detailing the causes, diagnosis, and treatment of each allergy in turn. Asthma is covered separately using the latest asthma guidelines to describe the risk factors, stratification, and accurate diagnosis.

Healthcare Economics Made Easy 3/e

By *Daniel Jackson*

Healthcare Economics Made Easy, third edition is a clear and concise text written for those working in healthcare who need to understand the basics of the subject but who do not want to wade through a specialist health economics text. It will equip the reader with the necessary skills to make valid decisions based on the economic data and with the background knowledge to understand the health economics literature. This new edition builds on the success of the second edition by updating the material on the NICE appraisal process and including new sections on health technology assessment in the USA and the key role of the Institute for Clinical and Economic Review. This book provides insight into the economic methods that are used to promote public health policies, the techniques used for grading and valuing evidence and the statistics relied upon, without trying to re-train the reader as a health economist.

Medical Statistics Made Easy 4/e

By *Michael Harris, Gordon Taylor*

It is a book of key statistics principles for anyone studying or working in medicine and healthcare who needs a basic overview of the subject. It is ideal for non-statisticians who need to understand how statistics are used and applied in medicine and medical research. Using a consistent format, the authors describe the most common statistical methods in turn and then rate them on how difficult they are to understand and how common they are. This fourth edition continues with the same structure as the previous editions, with new sections on cut-off points and ROC curves, as well as a new chapter on choosing the right statistical test. It also features a completely revised and updated "Statistics at work" section.

Improving the Mental Health Consultation

Introducing a short circuit tool to aid patient understanding and dispel stigma

By Shammy Noor

Patients with mental health issues present frequently in primary care and their consultations are often more challenging and time-consuming than those involving physical illness. For many patients there remains a significant stigma associated with mental ill-health and overcoming this adds further complexity to the consultation. *Improving the Mental Health Consultation* provides a simple 'short circuit' tool to help GPs and other healthcare professionals to explain mental health problems simply and effectively to their patients. The tool is straightforward, easy to convey within the confines of a 10-minute consultation and extremely effective in helping to break down the stigma that patients often feel. The tool has been developed and refined during over ten years of consultations in primary care.

Using CBT in General Practice 2/e

By Lee David

Using CBT in General Practice, second edition provides GPs with an overview of the basic principles of CBT and shows how these principles can be applied within a typical 10-minute consultation. The book is written in a user-friendly, interactive, and practical style and focuses on realistic ways to make CBT work by helping patients to make positive changes to their lives. Key features of this second edition include: case examples to highlight how the techniques can be applied in practice for patients with particular problems or clinical conditions, such as coping with negative thoughts problem-solving sections describe how to manage time constraints a new consultation model that can be used to implement CBT in general practice detailed overviews of the major clinical psychological conditions that can be treated using CBT, such as panic, low self-esteem, and insomnia.

Breaking Bad News

A ten step approach

By Peter Kaye

Breaking Bad News provides practical guidance on the key principles needed to create a framework for discussions with the patient. The ability to impart bad news well is an important skill for all doctors and many healthcare professionals. But it is perceived as a particularly stressful part of the job, even though it is a skill that can easily be understood and practised. When handled well it can significantly enhance the relationship with the patient and their relatives. 10 Simple Steps. The principles are presented as 10 simple steps which emphasise that the process of breaking bad news is a negotiation with the patient to ensure that you provide them with the correct level of information they need at that time. The steps also encourage the patient to talk and think about their situation.

NEW EDITION

Acute Medicine 3/e

By Declan O'Kane

From reviews of the previous editions: "Amazing book. The content is clear, and the recent guidelines are there!" *Acute Medicine* is a current and concise guide to hospital emergency medicine for registrars, junior doctors and medical students working on the wards. This new edition has been comprehensively revised and updated to incorporate the latest treatment guidelines. It has been substantially rewritten and streamlined to enable the reader to access the pertinent information even more quickly. It is not just a list of instructions but contains pathophysiology and useful clinical pearls: detailed management of acute medical and surgical emergencies, including in pregnancy general ward management issues descriptions of key procedures normal laboratory values emergency drug formulary.

Urgent and Out-of-Hours Care

A practical guide

By Hardeep Bhupal

Covers the most common conditions seen in an out-of-hours primary care or urgent medical care setting. This book is aimed primarily at GPs but will also be of interest to medical students, nurses, paramedics, pharmacists, and anyone involved with out-of-hours primary care and urgent medical care. It deals with acute medical conditions, ailments, and illnesses which a primary care clinician will be faced with when working outside a hospital setting and armed with only basic diagnostic aids. The book also contains key advice for working as an out-of-hours General Medical Practitioner and the change in working towards remote consultations. It deals with the complexities and challenges of telephone triage and video consultations, as well as home visits.

Dermatology Made Easy 2/e

By **Amanda Oakley**

NZ AUTHOR

NEW EDITION

Dermatology Made Easy 2/e has been comprehensively updated but remains designed to help GPs, medical students and dermatologists diagnose skin conditions with confidence.

Diagnosis is simplified by providing a comprehensive set of tables which offer differentials by symptom, morphology, or body site - including over 500 thumbnail photos.

Once you have narrowed down the diagnosis, cross-references guide you to more detailed descriptions, and another 700 photographs, covering: common infections, inflammatory rashes, non-inflammatory conditions, and skin lesions.

Every section provides consistent information on the disorder: Who gets it and what causes it? What are the clinical features, and does it cause any complications? How do you diagnose it? How do you treat it and how long does it take to resolve?

The book concludes with a comprehensive section on further investigations and treatment options. *Dermatology Made Easy* is the ideal rapid clinical reference - guiding diagnosis, advising on clinical features, and offering the best treatment options.

Dermatology and Skin Cancer Updated Edition

A Handbook for Hunters of Skin Cancer and Melanoma

AUS AUTHOR

NEW EDITION

By **Cliff Rosendahl, Aksana Marozava**

Dermatology and Skin Cancer, updated edition, is a handbook to help dermatologists, dermatoscopists and GPs easily differentiate between benign and malignant tumours, leading to fewer unnecessary biopsies and earlier treatment of cancers. Based around two easy to follow algorithms, Chaos and Clues and Prediction without Pigment, the book shows all dermatoscope users how to confidently diagnose skin lesions earlier and with greater precision.

In addition, this handbook also provides coverage of: * the microanatomy of the skin, * specimen processing and histopathology, * the language of dermatoscopy to help name and define structures and patterns, * approaches to skin examination and photo documentation, * revised pattern analysis as an additional diagnostic algorithm, * dermatoscopic features of common and significant lesions.

Using over 450 high quality images the authors provide a detailed algorithmic approach to assessing the skin; an approach that has been successfully taught to thousands of doctors around the world.

Rheumatology

By **Ahmad Al-Sukaini, Mohsin Azam**

Rheumatology: A clinical handbook is an essential resource for medical students who need an introduction, understanding and overview of the subject. Most competing texts either burden medical students with information they do not require, or cover rheumatology alongside orthopaedics and as a result compromise fundamentals of rheumatology. This book is different - it provides all the information students need during their rheumatology placement and signposts them to where they can find further information. A definition and brief pathophysiology for each condition is provided, which is linked to the respective clinical features. The book covers the core elements of diagnosis and treatment based on the latest national guidelines to swiftly bring students and junior doctors in training up to date.

Paediatrics: A Clinical Handbook

By **Joe Esland, Anouska Lerner**

Paediatrics: a clinical handbook provides all the essential information required for a successful paediatrics rotation. Written by two recently qualified junior doctors and a consultant paediatrician, the book offers an exam-centred, reader-friendly style backed up with concise clinical guidance. Building on the success of the other 'Clinical Handbook' titles (*Rheumatology* and *Psychiatry*), *Paediatrics: a clinical handbook* provides reader-friendly coverage of the subject in an attractive full-colour design. To help the reader get to grips with the subject quickly and easily, the book features a wide variety of learning aids including mnemonics, numerous clinical photos, OSCE tips, red flag boxes and rapid diagnosis boxes.

Catch Up Maths & Stats 2/e

By Michael Harris, Gordon Taylor, Jacquelyn Taylor

Catch Up Maths & Stats covers the core maths skills you will need on any life or medical sciences course including:

- * working with fractions and powers
- * preparation of a dilution series
- * how to calculate standard deviation
- * using and understanding graphs
- * analysing enzyme kinetics
- * choosing the right statistical test.

Over 200 examples are provided to show the relevance and application of maths and stats to your course.

This second edition also now provides further coverage of differentiation and integration alongside nearly 70 more questions and answers to help you test your understanding.

Catch Up Maths & Stats will bring you up to speed in the shortest possible time, even if you didn't study maths at advanced level.
