The Lost Art of Listening 3/e

Michael P. Nichols and Martha B. Straus

One person talks: the other listens. It's so basic that we take it for granted. Unfortunately, most of us think of ourselves as better listeners than we actually are. Why do we so often fail to connect when speaking with family members, romantic partners, colleagues, or friends? How do emotional reactions get in the way of real communication? This thoughtful, witty, and empathic book has already helped over 125,000 readers break through conflicts and transform their personal and professional relationships. Experienced therapist Mike Nichols provides vivid examples, easy-to-learn techniques, and practical exercises for becoming a better listener—and making yourself heard and understood, even in difficult situations.

Effective Psychotherapists

William R. Miller and Theresa B. Moyers

What is it that makes some therapists so much more effective than others, even when they are delivering the same evidence-based treatment? This instructive book identifies specific interpersonal skills and attitudes - often overlooked in clinical training - that facilitate better client outcomes across a broad range of treatment methods and contexts. Reviewing 70 years of psychotherapy research, the preeminent authors show that empathy, acceptance, warmth, focus, and other characteristics of effective therapists are both measurable and teachable. Richly illustrated with annotated sample dialogues, the book gives practitioners and students a blueprint for learning, practicing, and self-monitoring these crucial clinical skills.
