**The St Ives Artists: New Edition**  
**A Biography of Place and Time**

*By Michael Bird*

Our beautifully produced new edition, published in 2016, is now available in an accessible paperback format. The flourishing of international modernism in Cornwall was a unique episode in the story of modern art in Britain - perhaps anywhere in the world. No other small seaside town has been hosting to such a rollcall of major artists. Weaving in-depth research into a narrative of 'startling anecdotal richness', Michael Bird explores the many - often unexpected - connections between St Ives artists and broader currents in 20th-century British history. He sets the careers of international artists such as Barbara Hepworth, Ben Nicholson, Patrick Heron and Peter Lanyon in the context of a local environment that held powerful meanings for their work. Bird examines the influence of the two world wars, the birth of the Welfare State and the Cold War, the space race of the 1960s - all of which found echoes in artists' work - as well as the position of women artists in St Ives, the role of social class, and relations between artists and the community. The artists themselves emerge as vivid personalities.

**Remembrance Now**  
**21st Century Memorial Architecture**

*By Michele Woodger, Tszwai So*

Emotionally intelligent design is an overlooked area in contemporary architecture, and memorial, by default, are designed to evoke emotional responses from the public. This book provides an overview of the architect-led memorial design from the 21st century. Memorials featured are international in scope and include those designed by Moshe Safdie, Michael Arad, Daniel Libeskind, Peter Zumthor, MASS Design Group and Snohetta.

Each one of these is hauntingly eloquent and highlights the effectiveness of a memorial in focusing society's consciousness on important issues. The case studies are interspersed with interviews with the designers. The book begins with an exploration by the authors of alternative ways of interpreting memorials, such as concepts of permanence, loss, abstraction, physical experiences, and memory. It also considers some of the functions of memorials, common themes addressed by the works, and practical considerations facing architects.

### Toxic Exposure

The True Story behind the Monsanto Trials and the Search for Justice

By Chadi Nabhan

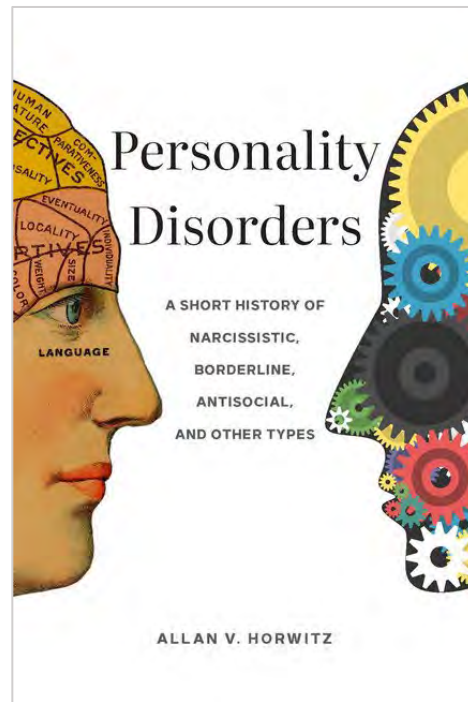

A behind-the-scenes look inside three key trials involving Monsanto's weed killer Roundup, cancer, and the search for justice-written by an expert witness medical oncologist who lived it all.

For years, Monsanto declared that their product Roundup, the world's most widely used weed killer, was safe. But that all changed in 2015, when the International Agency for Research on Cancer (IARC) analysed data from scientific studies and concluded that glyphosate, the active ingredient in Roundup, is probably carcinogenic. The Environmental Protection Agency (EPA) disagreed, other regulatory agencies got involved, and scientists clamoured to understand the link between glyphosate and cancer. Toxic Exposure tells the true story of numerous patients who developed non-Hodgkin lymphoma, a form of cancer, after using Roundup and their ensuing trials against Monsanto (now owned by Bayer, one of the largest agrochemical companies in the world).

### Personality Disorders

A Short History of Narcissistic, Borderline, Antisocial, and Other Types

By Allan V. Horwitz

The fascinating and controversial history of personality disorders. The concept of personality disorders rose to prominence in the early twentieth century and has consistently caused controversy among psychiatrists, psychologists, and social scientists. In Personality Disorders, Allan V. Horwitz traces the evolution of defining these disorders and the historical dilemmas of attempting to mold them into traditional medical conceptions of disorder.

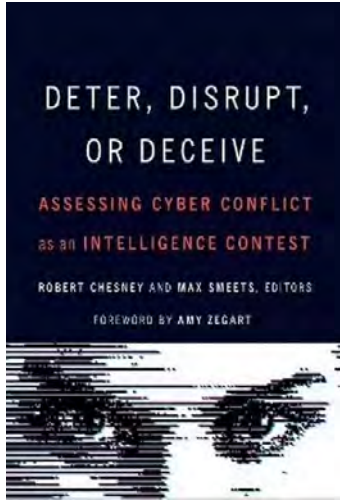

Using the Diagnostic and Statistical Manual of Mental Disorders, or DSM, as a guide, Horwitz explores the group of conditions that make up personality disorders and considers when they have been tied to or separated from other types of mental illnesses. He also examines how these disorders have often entailed negative moral and cultural evaluations more focused on perceived social deviance than on actual medical conditions. Deep conflicts exist in a variety of disciplines in determining the nature of these disorders.

**Producing the Acceptable Sex Worker**  
An Analysis of Media Representations

By Gwyn Easterbrook-Smith

This book considers sex worker representation in the news, where the public draws their understanding of the industry in the absence of lived interaction with it. Using New Zealand as a case study, the author encourages emerging discourse of acceptability for some sex workers, primarily those who do low-volume indoor work.

## Practical Psychometrics

A Guide for Test Users

NEW IN PAPERBACK

By Benjamin J. Lovett

### Key Sales Points:

- \*End-of-chapter exercises that emphasize application and understanding, with answers at the end of the book.
- \*Key terms are bolded throughout and accessibly explained in the end-of-book glossary.
- \*Resource appendix--annotated guide to articles and books on more advanced topics in psychometrics, assessment, and testing.

This is the first practitioner-oriented guide to basic psychometrics--the science behind test construction and validation.

It is an essential course text and clinical reference for anyone who needs to select and administer diagnostic tests or review test score data obtained by others.

Without assuming any mathematical background, the author describes the fundamentals of diagnostic testing, how to interpret score data, and how specific tests are used in school psychology, special education, counseling, and other contexts.

Concepts such as reliability, validity, and fairness and test bias are explained in an accessible, conversational way. Detailed case examples illustrate the dos and don'ts of presenting test score data to clients, parents, and teachers in oral feedback and written reports.

### Author Bio:

Benjamin J. Lovett, PhD, is Associate Professor of Psychology and Education at Teachers College, Columbia University, where he teaches courses in psychoeducational assessment, legal and ethical issues for school psychologists, and the history of psychology. Dr. Lovett has over 100 publications, focusing on the assessment of high-incidence disabilities, the provision of testing accommodations, and the nature and management of test anxiety. He also serves as a consultant to schools and testing agencies on disability and assessment issues.

### Supervising Individual Psychotherapy

The Basics and Beyond

By Katherine G. Kennedy, Randon S. Welton

After 30 years of declining practice among psychiatrists, psychotherapy is being increasingly recognized as a valuable tool in psychiatric care. While this renewed appreciation offers hope for the future, a serious challenge remains: There are alarmingly few psychiatrists equipped as psychotherapy supervisors to help train the next generation of psychiatrists. Encouraging psychiatrists to consider stepping into this important role is what makes Supervising Individual Psychotherapy such a timely and indispensable resource. With a multipronged approach that combines the theoretical and the practical, supported by illustrative clinical vignettes, this guide focuses on four key areas.

### Deliberate Practice in Rational Emotive Behavior Therapy

By Mark D. Terjesen, Kristene A. Doyle

Deliberate practice exercises provide trainees and students an opportunity to build competence essential rational emotive behavior therapy (REBT) skills while developing their own personal therapeutic style. These exercises present role-playing scenarios in which two trainees act as a client and a clinician, switching back and forth under the guidance of a supervisor. The clinician improvises appropriate and authentic responses to client statements organized into three difficulty levels—beginner, intermediate, and advanced—that reflect common client questions and concerns. Each of the first 12 exercises focuses on a single skill, such as psychoeducation, assessing and disputing irrational beliefs, helping clients differentiate maladaptive vs. adaptive behaviors and emotions, teaching clients the ABC model, and developing homework assignments.

A companion workbook for *Better Results*

Edited by  
**SCOTT D. MILLER, DARYL CHOW,  
SAM MALINS, and MARK A. HUBBLE**  
Foreword by **BRUCE E. WAMPOLD**

## Field Guide to Better Results

### Designing and Implementing an Individual Deliberate Practice Plan

*By Scott D. Miller, Daryl Chow, Sam Malins, Mark A. Hubble*

**AUS EDITOR**

Deliberate practice is a systematic approach for improving psychotherapy outcomes, one clinician at a time.

Written to be used in conjunction with *Better Results*, this book offers guidance from leading experts in designing deliberate practice activities specific to the individual practitioner.

This book demonstrates how to collect and use client outcome data to create an individualized professional development plan to improve the quality of service.

Along with providing guidance in understanding and mapping individual data onto the taxonomy for deliberate practice (TDPA), the expert chapter authors detail several factors that influence therapy outcomes, including client factors, therapist factors, client-therapist relationships, and more.

It aims to assist therapists in further understanding and applying the concepts needed to gain more effective outcomes.

#### Author Bio:

Scott D. Miller, PhD, is the founder of the International Center for Clinical Excellence--a consortium of clinicians, researchers, and educators dedicated to promoting excellence in behavioral health services. He conducts workshops and training in the US and abroad, helping hundreds of organizations both public and private achieve superior results.

Daryl Chow, PhD, is a practicing psychologist and trainer. He is a senior associate of the International Center for Clinical Excellence (ICCE). Daryl and colleagues published the first empirical study on deliberate practice in psychotherapy.

Sam Malins, DClinPsy, PhD, is a Clinical Psychologist working on the integration of physical and mental healthcare at Nottinghamshire Healthcare NHS Foundation Trust and the University of Nottingham. He works clinically in cancer care. His research focuses on ways to enhance psychological care across settings, often using digital technology.

Mark A. Hubble, PhD, is a founding member and senior advisor at the International Center for Clinical Excellence. He is the co-author and co-editor of many professional papers and several books--including the bestselling, award winning first edition of *The Heart and Soul of Change: What Works in Therapy*.

**Solution Art**  
A textbook of art and resource-orientated work

*By Paolo J. Knill, Herbert Eberhart*

Counselling, therapy, and coaching always work with the use of language. With art-oriented approaches, the limitations of language can be overcome. One of the most important works of expressive arts therapy, Loesungskunst is now available in English translation. The key concept of intermodality- the authors' term for oscillation between art-analog methods- combines with the primary focus on resources and strong emphasis on solutions to lay the groundwork for the method that is as vital now as it was originally. The importance of imagination, artistic and aesthetic experience to mental wellbeing is showcased, challenging the common focus on the cognitive and emotional facets of mental health.

**Supporting Trainees With Competence Problems**  
A Practical Guide for Psychology Trainers

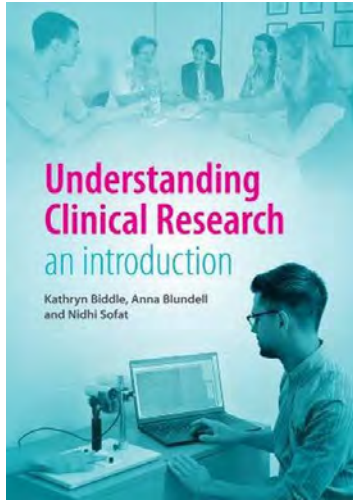

*By Rebecca A. Schwartz-Mette, Evelyn A. Hunter*

Trainees with competence problems are common in professional psychology training programs. This comprehensive resource guides trainers and administrators as they navigate the challenges involved in supporting these trainees. Trainees with problems of professional competence (TPPC) have difficulty acquiring and/or maintaining developmentally appropriate levels of functional or foundational competence, with deficits in skills, functioning, attitudes, ethical practice, and/or interpersonal behaviours. These situations can be stressful for all involved, from trainees facing difficult feedback and remediation, to trainers navigating their responsibility to both educate and gatekeep, to administrators and other stakeholders who uphold academic standards and assist trainees in their educational experience. Problems of professional competence are complex, often involving assessment, evaluation, relational, ethical, and even legal challenges.

## Planning Your Career Through Intense Interests

*By Yenn Purkis, Barb Cook*

Planning a career around your special or intense interests is possible and, in fact, easier than you might think!

If you're wondering how, you can turn your love of animals, intense fascination of transportation or passion for information technology (and much more!) into a fulfilling career, that you will never get bored of, you've come to the right place!

Yenn Purkis and Barb Cook are leading autistic advocates, employees and business owners and are using their first-hand knowledge and the power of special interests to help you plan your future in this book.

By straying from the conventional paths and thinking differently, Yenn and Barb could help take your passion for outer space and help transform you into a budding astronomer or even aerospace engineer!

Full of helpful advice and activities, including goal and vision setting, identifying your skills and personality attributes, looking at what makes a positive workplace, common attributes of autistic employees and business owners and challenging assumptions to name just a few, this book will help you to find work that you truly enjoy and thrive in the workplace.

### **Author Bio:**

Yenn Purkis is autistic and non-binary and has published a range of books with JKP since 2006. They actively speak at autism conferences and have increasingly spoken and written on autism and LGBTQ+ identities. They received the ACT Volunteer of the Year award for work in autism advocacy. Yenn lives in Canberra, Australia. Barb Cook is a Neurodivergent Developmental Educator and holds a Master of Autism degree from the University of Wollongong. She is a published researcher on autism and mental health, and recent projects of self-determination and self-advocacy for autistic adults and youth suicide prevention.

Barb is a prolific writer, speaker, and advocate on neurodivergence, and is founder of Spectrum Women Magazine, NeuroEmploy and the NeuroDiversity Hub, based in Gympie, Australia.

## The Red Beast Anger Workbook

For All Children Who Want to Tame Their Red Beast Including Those on the

By Kay Al-Ghani, Sue Larkey, Haitham Al-Ghani

### Key Sales Points:

\*Interactive workbook to help autistic children learn how to identify anger triggers and develop self-regulation.

This illustrated and interactive workbook will help children find ways to calm their Red Beast and learn how to prevent it from waking in the first place.

Full of practical activities and illustrated examples, it supports the development of emotional and sensory regulation and provides coping mechanisms for children who experience intense emotional flooding or meltdowns as well.

The workbook includes a helpful introduction for adults on the science of self-regulation, clear guidance on how to pace the learning and a wide range of activities such as scenarios to help children explore their anger, anger management plans, and exercises that encourage interoceptive awareness.

It also addresses common causes of anger including perfectionism, winning, and losing and discusses the importance of a positive attitude and using kind words in a child-friendly way.

Join Danni and his friends and family as they explore the challenges they face from the Red Beast and how they overcome them.

### Author Bio:

K.I. Al-Ghani is a specialist advisory teacher and international author. She is currently a lecturer at the University of Brighton, delivering their PG Cert Autism. She has worked in both mainstream and special schools and trained professionals, parents, and caregivers, in all aspects of ASD. She has spoken at many conferences, including those organised by the NAS. As an author and mother of a son with ASD, she has spent over 30 years researching the enigma that is autism.

Sue Larkey has taught as a primary school teacher and as a special education teacher teaching students with ASD in both a mainstream and a specialist autism school. She combines this practical experience with extensive research, having completed a master's in special education and currently undertaking a Doctorate in Education. Sue has an Internationally Top-Rated Podcast with over 1 million Downloads (The Sue Larkey Podcast) and a following of over 120,000 in her Facebook Community (Sue Larkey Teacher).

Haitham-Al-Ghani is a talented book illustrator and cartoon animator. He graduated with Triple Distinction in Multi-Media Studies and won the Vincent Lines Award for creative excellence.

## The Red Beast 2/e

Helping Children on the Autism Spectrum to Cope with Angry Feelings

By K.I. Al-Ghani, Haitham Al-Ghani

### Key Sales Points:

- \*This book has been extremely popular, achieving lifetime sales of over 50,000 copies.
- \*The new, inclusive language and illustrations will make sure it covers all children who struggle to regulate emotions, with a less heavy focus on Aspergers Syndrome.
- \*Kay Al-Ghani is a well-known author in her field and is releasing a The Red Beast workbook with JKP in 2023.

Deep inside everyone, a red beast lies sleeping. When it is asleep, the red beast is quite small, but when it wakes up, it begins to grow and grow.

This is the story of a red beast that was awakened. Danni is in the school playground when his friend, Charlie, kicks a ball that hits him in the stomach, and wakes up the sleeping red beast: 'I hate you - I'm gonna get you!'

The red beast doesn't hear the teacher asking if he's okay. It doesn't see that Charlie is sorry - how can Danni tame the red beast?

The second edition of this vibrant fully illustrated children's storybook is written for children aged 4-9 and has been updated with inclusive up-to-date language and new illustrations to make sure every child's red beast can learn to be tamed!

This is an accessible, fun way to talk about anger, with useful tips about how to tame the red beast and guidance for parents on how anger affects children who struggle to regulate their emotions.

### Camilla, Super Helper

*By Julie Dillemath, Laura Wood*

Can super helpers Camilla and Parsley help their friends the bees find enough flowers and water during a hot, dry summer?

Camilla the cartographer and her loyal sidekick Parsley are back again to help their friends in this second companion book to the critically acclaimed Camilla, Cartographer.

With summer comes sun, lemonade, and... drought? Camilla and Parsley's bee friend Melli and the rest of her hive are having trouble finding enough water and flowers to make honey.

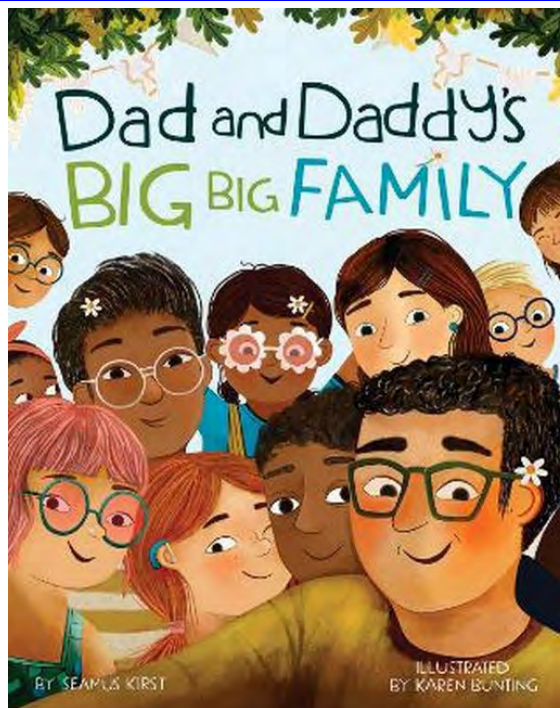

Can Camilla use her mapping skills--and the friendship of the other forest animals--to help?

Includes a Note to Parents & Caregivers with more information about map-making, spatial awareness, and the importance of bees!

**Integrating Clinical Aromatherapy in Palliative Care**

*By Carol Rose, Rhiannon Lewis*

By bridging the gap between conventional medical interventions and complementary approaches using aromatherapy, palliative care nurse and clinical aromatherapist, Carol Rose, demonstrates how an integrated and evidence-based approach can have the most significant impact on quality-of-life in patients with life-limiting illness. Aromatherapy is already a fundamental practice in many palliative care settings, but its benefits remain under-researched and under-represented. Each chapter of this book incorporates a person-centred focus to consider the integration of various aromatherapy approaches for a range of end-of-life symptoms, alongside conventional medical options.

**Shamanism in Chinese Medicine**

**Applying Ancient Wisdom to Health and Healing**

*By CT Holman, Master Zhongxian Wu*

This engaging, highly anticipated book compellingly describes healing techniques of Chinese shamanism while respecting the tradition. CT Holman, a medically trained and licensed clinician of over 20 years, clearly explains how Chinese shamanism can be seamlessly woven into modern lifestyle and contemporary medical practices. He explores effective methods to address physical pathologies and emotional imbalances by applying shamanic-influenced techniques including visualizations, verbal healing, and shamanic drumming, among others for self-care and medical treatment. The primary resource for the material presented originates from the author's intensive decade-long study under shamanic teacher, Master Zhongxian Wu.

**Skepticism's Pictures**

**Figuring Descartes's Natural Philosophy**

*By Melissa Lo*

In seventeenth-century northern Europe, as the Aristotelian foundations of scientia were rocked by observation, experiment, confessional strife, and political pressure, natural philosophers came to rely on the printed image to fortify their epistemologies-and none more so than Rene Descartes. In Skepticism's Pictures, historian of science Melissa Lo chronicles the visual idioms that made, sustained, revised, and resisted Descartes's new philosophy. Drawing on moon maps, political cartoons, student notebooks, treatises on practical mathematics, and other sources, Lo argues that Descartes transformed natural philosophy with the introduction of a new graphic language that inspired a wide range of pictorial responses shaped by religious affiliation, political commitment, and cultural convention.

## Practical Psychometrics

A Guide for Test Users

By Benjamin J. Lovett

**NEW IN PAPERBACK**

### Key Sales Points:

- \*End-of-chapter exercises that emphasize application and understanding, with answers at the end of the book.
- \*Key terms are bolded throughout and accessibly explained in the end-of-book glossary.
- \*Resource appendix--annotated guide to articles and books on more advanced topics in psychometrics, assessment, and testing.

This is the first practitioner-oriented guide to basic psychometrics--the science behind test construction and validation.

It is an essential course text and clinical reference for anyone who needs to select and administer diagnostic tests or review test score data obtained by others.

Without assuming any mathematical background, the author describes the fundamentals of diagnostic testing, how to interpret score data, and how specific tests are used in school psychology, special education, counseling, and other contexts.

Concepts such as reliability, validity, and fairness and test bias are explained in an accessible, conversational way. Detailed case examples illustrate the dos and don'ts of presenting test score data to clients, parents, and teachers in oral feedback and written reports.
